

Küreselleşme ve Eğitim Eşitsizlikler

Yrd. Doç. Dr. Ekber TOMUL

Abstract

It is claimed that globalisation reduces inequality. According to 1980-1998 data inequality continuous in the rate of literacy, enrolment ratio and mean years of schooling between high developed and low developed countries; in developing and low developed countries the inequality in the rate of literacy and enrollment ratio is valid against women.

Key Word: globalisation, inequality of education
